

## FEATURED PROJECT: ROSARY HOME AGED CARE FACILITY

The Rosary Home Aged Care is a complete redevelopment of the existing landscape. The aim of the project was to create a useable and tranquil space for the residents of the facility. A curved water wall, cascading spillways and curved ponds with bubblers, surrounds an existing bronzed central statue of Mary. The H2O team also completed all the landscaping components of the project.

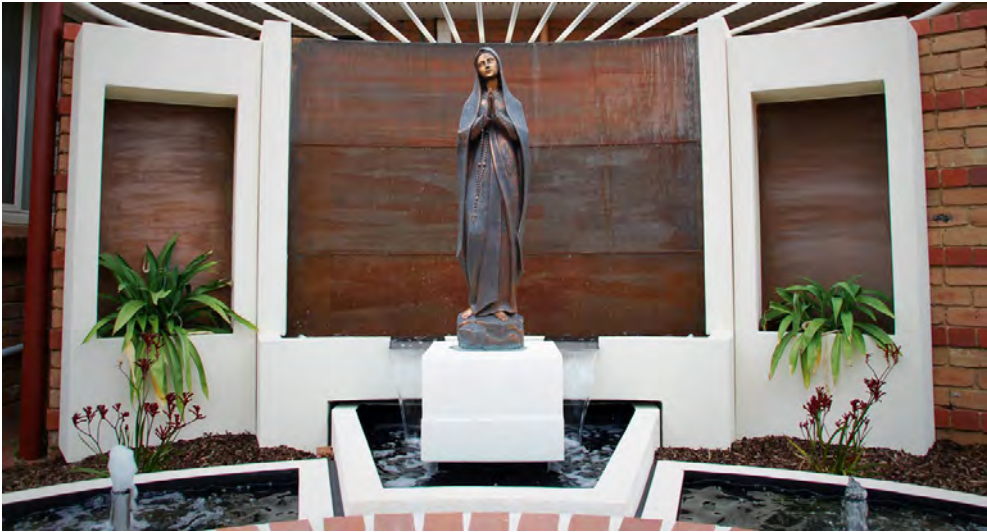

### CONCEPT DEVELOPMENT

Using concept sketches to portray our ideas to the client, the H2O Designs team aimed to create an open space that integrated custom built architectural products like seating and planter boxes into the existing area. This design methodology has resulted in a uniquely styled set of components that when combined create an overall look and feel that reflects the surrounding style and architecture.

## H2O DESIGNS ARCHITECTURAL PRODUCTS

This project highlights the vast and unique range of architectural products that H2O Designs can design and manufacture using Licom76™. Included in this design are six water features with a water wall clad with aged copper sheets and custom built stainless steel spillways, planter boxes and seating with external grade cushions.

Have a look at the before and after photos of the area...
